Electric utility capital projects typically refer to significant investments made by electric utility companies in infrastructure, facilities, equipment, and technology to improve, expand, or maintain their electricity generation, transmission, and distribution systems. These projects are essential for ensuring reliable electricity supply, meeting growing demand, complying with regulations, and integrating renewable energy sources.

- Crew Commitment / Staff Meeting to discuss upcoming projects.
- Hiring Contractors to fill the void.
- Procurement placement.
- Balancing Budgets.
- Is your crew willing to work scheduled overtime? Is it long days or weekends?

- 11:15 am **Work Zone Safety**  
Presenter: Anthony Calascibetta, CUSP NEPPA Director of Safety & Training
- Noon **Lunch and Next Meeting Discussion**
- 1:00 pm **Adjourn**
